Mr. Steve M. Alexander
Perimeter Areas Section Manager
Nuclear Waste Program
State of Washington
Department of Ecology
1315 W. 4th Avenue
Kennewick, Washington 99336-6018

Mr. Douglas R. Sherwood
Hanford Project Manager
U.S. Environmental Protection Agency
712 Swift Blvd., Suite 5
Richland, Washington 99352

Dear Messrs. Alexander and Sherwood:

TRANSMITTAL OF FINAL PROPOSED PLAN FOR 100-IU-1, 100-IU-3, 100-IU-4, AND
100-IU-5 OPERABLE UNITS

Attached are 5 copies of DOE/RL95-60, Proposed Plan for the 100-IU-1, 100-IU-3, 100-IU-4, and 100-IU-5 Operable Units, Revision 0, for public comment. This proposed plan has been prepared in support of Expedited Response Actions that have been completed at the Riverland Rail Yard (100-IU-1), the Wahluke Slope (100-IU-3), the Sodium Dichromate Barrel Landfill (100-IU-4), and the White Bluffs Pickling Acid Crib (100-IU-5).

The proposed plan has been revised according to comments that we have received on Draft A from the U.S. Environmental Protection Agency (EPA), State of Washington Department of Ecology (Ecology), and the U.S. Department of Energy (DOE)-Headquarters during May and June 1995. The proposed plan has been modified, as appropriate, to be consistent with the format and content of 100 Area proposed plans as recently agreed to by the DOE Richland Operations Office, EPA and Ecology.

If you have any questions, please contact Mr. Glenn Goldberg of my staff on 376-9552.

Sincerely,

Richard A. Holten, Director
Plateau Remediation Division
